10. Rijnstrom — lively shade of rose pink.
11. Sir Edward Landseer — very bright crimson.
12. Thor — deep salmon pink with aniline red eye.

---

### CULTURAL DIRECTIONS

In the hardy plant line there is nothing which will give you a bigger show than a planting of hardy phlox. They are the most effective and useful plants in the garden during the late summer and fall. Everyone loves their gorgeous brilliant colorings. To grow phlox well the soil should be well drained, deeply spaded and enriched with well rotted manure or bone meal. Set the plants 10 inches apart in rows 3 feet apart. Never let the plants go to seed. Never water overhead but keep blooms and leaves dry. Let hose run slowly on the ground and thus prevent mildew.
